ISO 27001

Information Security

As data has gained more importance in business, the security of that information has become even more crucial.

ISO/IEC 27001 is the world's best-known standard for Information Security Management Systems (ISMS). It defines requirements that an ISMS must meet. The ISO/IEC 27001 standard provides companies of any size and from all sectors of activity with guidance for establishing, implementing, maintaining, and continually improving an information security management system.

Conformity with ISO/IEC 27001 means that an organisation or business has put in place a system to manage risks related to the security of data owned or handled by the company, and that this system respects all the best practices and principles enshrined in this international standard.

Information Security

Importance of ISO 27001:22.

With cyber-crime on the rise and new threats constantly emerging, managing cyber-risks can seem challenging. ISO/IEC 27001 helps organisations become risk-aware and proactively identify and address weaknesses.

ISO/IEC 27001 promotes a holistic approach to information security, covering people, policies, and technology. Implementing an ISMS according to this standard is a tool for risk management, cyber-resilience, and operational excellence.

Benefits of ISO 27001:22.

Resilience to cyber-attacks. ISO/IEC 27001 helps organisations prepare for and defend against cyber threats.

Preparedness for new threats. By following ISO/IEC 27001, organisations stay up-to-date with security practices.

Data integrity, confidentiality, and availability. ISO/IEC 27001 ensures that critical data remains secure.

Security across all supports. Whether it's digital or physical, ISO/IEC 27001 covers all aspects of security.

Organisation-wide protection. ISO/IEC 27001 extends security practices throughout the entire organisation.

Cost-savings. Effective risk management reduces potential financial losses due to security breaches.

Information Security

ISO 27001:22 for SMEs.

Small and medium-sized businesses (SMEs) can benefit from ISO/IEC 27001 just like larger companies.

Information security management gives SMEs the confidence to meet expectations, from legal requirements to new business opportunities.

Customised packages are available to help SMEs achieve ISO/IEC 27001 compliance without unnecessary complexity or cost.

Remember.

ISO/IEC 27001 not only safeguards your reputation but also helps you compete effectively in the market. If you're an SME, consider implementing ISO/IEC 27001 to enhance your information security practices.
